SOYA PRODUCTS DISTRIBUTION
(January 31, 1944)

This is a partial list of companies handling products containing soya, the names of the products distributed, and their areas of distribution.

To give a complete list of domestic soya products and their distribution is impractical at this time. In furnishing this partial list in an effort to aid you, it should be understood that no discrimination is intended and no guarantee of reliability is implied.

Before using the list, it may be well to remember three points:

1. Distribution of soya products is still not thorough in all localities, but it has spread rapidly in the past few months and companies indicate that further expansion is planned. With new food products, increases in consumer demand and distribution must go hand-in-hand.

2. It cannot be expected that all wholesalers in all localities will carry all products. Consumers who cannot find certain items and who wish to have them stocked should let this fact be known to their local distributors.

3. This list will be revised from time to time so that any others not listed can be added.

Compiled by the Grain Products Branch
and
Industrial Feeding Section of the
Office of Distribution of the
War Food Administration, Western Region.
